S20 ENGINE PARTS

S20 Front cover SET

The S20 front cover is a difficult part to repair, as it is prone to corrosion around the water pump and cracks and damage to the driven gear bearing support. This reproduction uses steel for the bearing insertion part.
It is designed with an emphasis on durability.

Price: 1 SET **¥294,000**

S20 GTR Blowby hose

This is a blow-by hose that connects the tappet cover to the air cleaner box. Because it is a rubber product, it needs to be replaced periodically before cracks occur. It is made of flexible oil-resistant rubber.

Price: **¥4,800**

S20 71B Bell Housing

The genuine 71A transmission cannot be repaired because most of the overhaul parts are no longer manufactured. By replacing this housing with a 71B transmission from a GC210 or S130, the 71B can be installed. Furthermore, with some modification it can be changed to a 71C, allowing the combination of a cross transmission or quick shift. (The 71B also has a cross transmission setting.)

Price: **¥300,000**

S20 Intake manifold heater connector

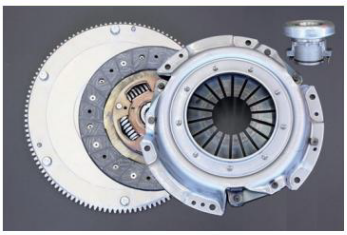

* Hose size 16φ Thread size 3/8

This is a water-related part that is prone to corrosion. We recommend replacing it as soon as possible before water leaks occur.

Price: **¥1,500**

S20 large diameter clutch kit

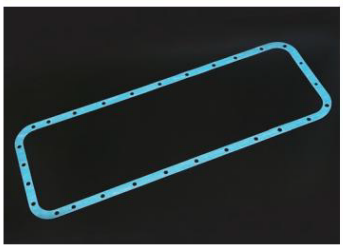

Due to the discontinuation of the OEM clutch, we have been inundated with inquiries about making clutches. We have completed the clutch that meets your needs: easy to operate with a pedal that is not too heavy, easy to use with half-clutch, excellent operability, and sporty characteristics. Furthermore, we have increased the clutch diameter from the standard 215ϕ to 225ϕ to improve transmission power. We offer three types of clutch discs depending on the application.

1. **Type A Kit** **¥104,700**
   (Super Disc specification)
2. **Type B Kit** **¥99,700**
   (reinforced non-asbestos disc specification)
3. **Type C Kit** **¥88,700**
   (STD non-asbestos disc specifications)

(Updated 2026.08.03)

Note:
If you are using a genuine starter, the tip will come into contact with the flywheel.
Be sure to replace it with a planetary gear starter.

S20 Reinforced Oil Pan Gasket

Withstands continuous use up to 400 degrees! A reinforced gasket made of ceramic fiber material with excellent heat and oil resistance. Unlike genuine cork products, the gasket will not be crushed or protrude when tightened, allowing for increased tightening torque.

•Price: **¥6,000**

•Gasket thickness: 1.5mm

S20 ARP reinforced flywheel bolts

ARP (USA) Strength
standard: 200,000psi
Tightening torque: 18.5kg/m

price **¥12,000** /SET

S20 Oil fillercap

The original shape has been kept intact, with an emphasis on aesthetics achieved by using an all-aluminum buffed finish.

price: **¥9,000**
*Rubber gasket included

S20 Chromoly Lightweight Flywheel

(For 215mm standard clutch)

The most effective way to make the S20 engine more responsive is to reduce the weight of the flywheel.
The flywheel is made of highly durable SCM material, and has a thin wall design while maintaining high strength. Two types are available depending on the application, from the STD type for street use to the R type for racing use.

Chromoly lightweight flywheel STD type
(Weight: 5.0kg) price: **¥50,000**

Chromoly lightweight flywheel R type
(Weight: 4.5kg) price: **¥54,000**

S20 Revival Parts

Dowel & Oil Jet Set

A set of three parts: two oil jets on the top front of the cylinder block and one dowel on the rear side.

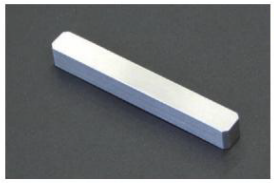

price: **¥2,500**/SET

S20 Plated Tappet Cover Nut Set

A reproduction of the tappet cover tightening nut. (Buffed + chrome plated)

price: **¥9,000**/SET

Crankshaft key

This is a machined key material designed to fit the original bolt-on size.

price: **¥2,500**

S20 Overhaul Parts

1. Tappet cover rubber gasket / inner and outer set
price: **¥15,000**

2. Tappet cover seal washer / set of 6
(Updated 2026.11.02) price: **¥3,480**

3. Tappet cover half-moon rubber seal / set of 4
(Updated 2026.11.02) price: **¥9,320**
