

If you want more sports potential.
 If the demands are strong, you can set it freely.
 You will probably feel the need to adjust the vehicle height to make this possible.
 Of course, the vehicle height balance is also improved, as are the dampers and suspension.
 The overall balance of the pillow upper and other parts brings you closer to the limits of running.
 High quality for users who pursue their ideals.
 You can realize the potential.

Height adjustment kit

Note: For improved functionality and safety, use in conjunction with the pillow upper mount (sold separately).

Height adjustment kit (51φ one-touch type, no welding required)

* Remove the original spring tray and install the height-adjustable suspension. Just put it on and you can use it.

Front compatible vehicle models
 S30 (-S49,10)
 S130, GC10, GC110, GC210, R30

Rear compatible vehicle models
 S30 (-S49,10)
 S130, GC210, R30 (50φ shock)

Price
 2 bottles set ¥66,000

Height adjustment kit (45φ one-touch type, no welding required)

* Remove the original spring tray and install the height-adjustable suspension. Just put it on and you can use it.

*When installing the vehicle height adjustment without the pillow upper mount requires Pillow Collar B (sold separately).

Rear compatible vehicle models
 S130, GC210, R30 (Shocks of 45φ or less)

Price
 2 bottles set ¥66,000

Height adjustment kit (55φ welding type)

* Remove the original spring tray and install the height-adjustable suspension. Cover and weld.

Front compatible vehicle models
 S30 (S49,11-), S31

Rear compatible vehicle models
 S30 (S49,11-), S31

Price
 2 bottles set ¥66,000

Height adjustment kit (51φ strut short processing type)

* It can easily eliminate bottoming out, which is a problem when lowering the vehicle height. The strut is completed.
 *Short shocks are sold separately. Please see the shock page.
 Installation requires cutting and welding of the struts.

Front compatible vehicle models
 S30 (-S79.10)
 S130, GC10, GC110, GC210, R30

Price
 2 bottles set ¥66,000
